

Assignment: Nomenclature Flashcards

- Create a series of flashcards (a minimum of five). The flashcards will test your ability (or your neighbour's ability) to name hydrocarbons.
- There should be a picture on one side and the correct name of the compound on the back.
- All pictures should be prepared using ChemsSketch on your computer (if you do this at home, a free download can be found at www.acdlabs.com)
- The use of ChemsSketch will be discussed in class
- Try to create a range of names from easy to downright cruel (all names must follow our rules).
- Useful "Tools": Structure Properties, Clean Structure, etc.
